DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Einarsson et al.

Einarsson discloses a support bandage for a joint between bones (Figures 1-9), comprising a small fraction having two opposite first longitudinal sides sewn with two opposite second longitudinal sides of a large fraction (Fig.1), wherein the small fraction is incurved towards the large fraction (Fig.1), and has two arcuate seams on the small fraction and a segment between the two arcuate seams is more incurved than two end segments outside the arcuate seams (Figure 1), and the two arcuate seams are away from a wearer's joint (Figure 1).

Allowable Subject Matter

3. Claims 2-3 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Frangi et al, Ruiz, Bodenschatz et al, Detty, Springs, Caprio Jr. et al, Hess et al and Senn et al are cited to show knee supports.
